## AKG C3000B LARGE DIAPHRAGM CARDIOID CONDENSER MIC

The earlier model C3000 has had a large fan club in the project studio and home recording worlds for years. For the new C3000 B, AKG designed a special 1-inch large-diaphragm transducer that closely approximates the vibration performance of top-class studio microphones, but can be made at much lower cost. Due to its surface area and special capsule tuning, the C 3000 B large-diaphragm transducer produces an exceptionally pleasing, smooth sound. Unlike in the C 3000, the switchable 10-dB preattenuation pad immediately follows the transducer in the signal path, thus increasing the C3000 Bs SPL capability by a true 10 dB. Loud sound sources are therefore no problem. An acoustically optimized cardioid polar pattern makes the C 3000 B an excellent choice for both recording and live sound applications where high gain before feedback is paramount.

C 3000B

Features:

- Frequency range 20 to 20,000 Hz
- Max. SPL 140/150 dB (k=0,5%)
- Preattenuation pad 10 dB, switchable
- Impedance 200 ohms

Applications:

- Theatre
- Conference
- Rock n Roll
- Live Event
- Leisure Facilities
