d&b audiotechnik MEDIUM MUSIC PA SYSTEM 1

d&b audiotechnik Medium Music PA System 1 - 150 - 300 people

The E12 is a high performance 2-way multipurpose loudspeaker employing an integrated coaxial driver. The E12 can be used for speech and music applications as stand-alone full range systems or incorporated into larger distributed sound reinforcement situations and with the addition of an d&b subwoofer can also easily reproduce high level music program. The multi faceted shape of the enclosure allows use either in an upright or horizontal orientation as well as deployment as a stage monitor. The E12 has an 80 x 50 dispersion pattern (h x v). The horns are easily rotatable through 90 providing 50 x 80 or 50 x 110 dispersion patterns. The E12 cabinet is constructed from polyurethane integral hard foam with an impact resistant paint finish incorporating handles and a hidden socket to accept loudspeaker stands.

The E18-SUB is a compact, very low tuned bass-reflex design employing a single 18 inch driver.

The Soundcraft M8 is exceptionally easy to use. The control surface will be immediately familiar to anyone who has used a mixer before and will quickly become second nature even to a novice. All inputs, EQ, auxes, panning and level controls are presented clearly, saving you time when creating your mixes and providing you with more time to spend on achieving the best sound. High quality 100mm faders combine with signal and peak LEDs on every channel and high resolution output metering places the operator in total control. Youll find no unsightly screw heads anywhere on the M Series front panel to get in the way of your mixing, while a durable, multi-coat paint finish, ensures that a Soundcraft M Series console always looks as good as it sounds.

M8 - 8 mono inputs, 4 stereo inputs, 4 stereo returns

Other systems are also available. Crew can supplied on request, e for crew. If you would like to discuss feel bitalsound.com
