LOUDSPEAKERS

d&b audiotechnik E6 LOUDSPEAKER

The E6 is a relatively small high performance multipurpose loudspeaker employing an integrated coaxial driver. The horn with its 100 x 55 dispersion pattern can easily be rotated through 90 providing a 55 x 100 pattern without the use of tools. This enables deployment of the loudspeaker either vertically or horizontally. Its distinctive cabinet design and extensive range of accessories allow easy deployment in almost any situation, including stage monitoring. It provides a very compact reinforcement solution that inspires through its sound quality and is also perfectly compatible with the larger E8 and E12 loudspeakers. With the addition of an E12X subwoofer or any other E-Series subwoofer it can also reproduce high level music program.

The E6 can be driven either by the d&b D20, D80, D6 or D12 channel power amplifiers configured for the E6.
