LOUDSPEAKERS - SUB BASS

FLARE AUDIO Q18 QUADHORN SUB BASS (2x18 inch)

Features:
• Superior sound quality
• Minimal size and weight
• NanoflowÈ Technology
• VortexÈ Technology

With its incredible frequency range of powerful, clear bass in a compact enclosure, the Q Series delivers the ultimate in directional bass for touring and installations.

The Q Series employs Nanoflow driver alignment and Vortex technologies to produce deep and directional bass for touring, clubs and portable sound. Optimised driver alignment allows for efficient coupling, with the minimum amount of low-frequency wave damage. Ideally used in a horizontal array for touring sound, the Q Series creates clean, focused, highly directional bass. At a fraction of the size and weight of typical enclosures, this bass speaker design delivers significant transport savings for tours and hire companies.
