COMPUTING - SWITCH OVER

NEMESIS DANTESW-1 -DANTE CHANGE OVER UNIT FRAME

Comes with one 32/32/32 card as standard

The Nemesis DANTESW-1 digital audio switchover unit is a reliable way to switch between two DANTE sound sources remotely via GPI or automatically as part of a changeover sequence direct from the Nemesis CCS-2 Computer Control Switch. The standard unit enables two 32 channel sources to be switched, the unit can be expanded with the addition of one DANTESW-EXP expansion card to enable two 64 channel sources to be switched and further expanded with the addition of another DANTESW-EXP card to enable two 96 channel sources to be switched.

This professional 1U 19", standard rack mount solution is mains powered, and can be remote controlled by other equipment in the Nemesis range such as the CCS-2 Control Switch, extension button boxes, or any other 3rd party systems.
