WIRELESS RADIO MICROPHONES

SHURE AXIENT DIGITAL 4 WAY ADX2 HANDHELD SYSTEM

Incorporating the most innovative wireless audio technology in the world, Axient Digital was engineered from the ground up for professional productions that demand flawless execution. With an unprecedented level of signal stability and audio clarity, plus flexible hardware options, advanced connectivity, and comprehensive control, it’s a wireless system built to take on the challenges of today, and tomorrow.

 With outstanding signal quality in even the most complex, congested environments, Axient Digital ensures maximum stability, range, and clarity for uncompromising audio anywhere, every time.

 Axient Digital defies limitations for both RF and audio quality. With industry-leading low latency, transparent frequency response, and wide dynamic range, nothing gets in the way of true, pure sound. No matter the setting, it’s Shure audio quality you can count on.

AD4Q Four-Channel Receiver

-Compatible with all AD and ADX transmitters
 -True digital diversity reception per channel for drop-out resistance
 -Networked control with Wireless Workbench® and ShurePlus™ Channels app
 -Quadversity™ mode for extended antenna coverage and improved RF signal-to-noise
 -DC module version available to support redundant power

ADX2 Handheld Transmitter

-Sleek design with powerful features
 -Durable, moisture-resistant, lightweight metal case
 -SB920 rechargeable batteries for up to 9 hours of runtime
 -External contacts for docked charging, with optional fully-covered radome
 -Diversity ShowLink-enabled for remote transmitter control and automatic interference avoidance

Kit comprised of the following:
1 x Shure Axient Digital AD4Q Receiver
4 x Shure Axient Digital ADX2 Handheld Transmitter, includes 1 rechargeable battery
1 x ADA
4 x SM58/BETA58 Capsule
1 x Charger
All the aerials, spares & cable you need.
Bespoke systems setup and other capsules are available on request.
