d&b audiotechnik SMALL SPEECH PA SYSTEM

d&b audiotechnik SMALL SPEECH PA SYSTEM - 50 - 100 people

The E8 is a high performance 2-way multipurpose loudspeaker, employing an integrated coaxial driver. The E8 can be used for speech and music applications as a stand-alone full range system, or incorporated into larger distributed sound reinforcement situations. With the addition of any other E-Series subwoofer, it can also easily reproduce higher level music program. The multifaceted shape of the enclosure allows use either in an upright or horizontal orientation as well as deployment as a stage monitor. The 90° x 50° dispersion pattern (h x v) of the horn is easily rotatable through 90° to provide a 50° x 90° dispersion pattern. The E8 cabinet is constructed from polyurethane integral hard foam with an impact resistant paint finish incorporating a handle and a socket to accept loudspeaker stands.

The Soundcraft M8 is exceptionally easy to use. The control surface will be immediately familiar to anyone who has used a mixer before and will quickly become second nature even to a novice. All inputs, EQ, auxes, panning and level controls are presented clearly, saving you time when creating your mixes and providing you with more time to spend on achieving the best sound. High quality 100mm faders combine with signal and peak LEDs on every channel and high resolution output metering places the operator in total control. You'll find no unsightly screw heads anywhere on the M Series front panel to get in the way of your mixing, while a durable, multi-coat paint finish, ensures that a Soundcraft M Series console always looks as good as it sounds.

M8 - 8 mono inputs, 4 stereo inputs, 4 stereo returns

Other systems are also available. Crew can supplied on request, please email us for a quote for crew. If you would like to discuss feel free to contact us hire@orbitalsound.com
