AMPLIFIERS

POWERSOFT AUDIO T904 4 CH AMP WITH DANTE

The T Series is a very flexible and cost-effective amplifier platform with loudspeaker processor. The T904 is designed to power bi-amped systems like stage monitors, 2-way point source speakers, and 2-way line sources, as well as smaller subwoofers.

The amplifiers feature input via Dante, AES3, and analog. The Dante and AES3 solutions are optimized for daisy-chained distribution of 2-channel audio for distribution to many amplifiers without the need for external switches/repeaters/ splitters. A simple Dante system has a daisy chain with the mixing console at one end, a WiFi access point at the other end, and the amplifiers in-between.
