COMMUNICATIONS - WIRED SYSTEM

RIEDEL WIRED 6 WAY PUNQTUM DIGITAL COMMS SYSTEM

Complete wired Communication System

The Q210 P – Speaker Station gives you full control in a cost-effective and easy-to-use package. 4 Channel communication, and programmable buttons allow muting all mics, make paging announcements or trigger logic outputs. Equipped with a network switch with 4 ports. Two of them are PoE powered to drive up to 4 wired beltpacks each. The Q210 P Speaker Station is your complete, self-contained communication hub.

The easy-to-use and ergonomic Q110 Beltpack offers two channels of partyline intercom and is packed with many useful features: power can be supplied via standard PoE switch or from our speaker station, beltpacks are daisy-chainable to up to eight units on a single network connection and you can even replay missed comms like voice-mail. It’s the perfect solution for improved team communication during events from small to large.

Kit comprised of the following:

1 x Riedel PUNQTUM Q210 Rackmount Remote
6 x Riedel PUNQTUM Q110 Beltpack
6 x Riedel PUNQTUM Q910 Single sided Headset

Additional Rackmount remotes, and alternative setups available on request. Other Headsets available on request.
