## MIDI SOLUTIONS T8 8 WAY MIDI THROUGH BOX

The MIDI Solutions MultiVoltage T8 is a 1-in 8-out MIDI Thru Box. All MIDI messages appearing at the T8's MIDI input are passed to each of its eight MIDI Thru outputs. Active circuitry cleans up any skewing of MIDI data bits that has occurred at the input, ensuring reliable operation in setups that require daisy chaining or long cable runs.<br/><br/>The T8 is MIDI-powered, and requires no batteries or power supply to operate with most MIDI products. A MIDI indicator LED lights up when the product is powered and flashes when MIDI data passes through it.<br/><br/>MIDI Solutions MultiVoltage products are compatible with both the original 5V and new 3.3V MIDI specifications
