

MICROPHONES - PREAMP

YAMAHA AD8HR 8CH REMOTE MIC INPUTS INC 48V

With the AD8HR Yamaha introduces a new generation of 8-channel remote microphone preamp/AD converters combining unparalleled sound quality with a host of innovative functions in a compact 1U rack size unit. The AD8HR can be used with Yamaha digital consoles such as the PM5D, DM2000 and DM1000, providing high-quality remote microphone preamps with analog circuitry derived from the extraordinary PM5000 analog console. The AD8HR provides digital audio output via high-performance 24-bit/96-kHz AD converters, and simple digital connection allows gain, filter, and phantom power control right from the console!
