LOUDSPEAKERS - SUB BASS

d&b audiotechnik B2 ULTRA SUB BASS SPEAKER

The B2 subwoofer with its high output bandpass horn design and extremely high SPL is ideal for extended bass requirements. It is configurable to be either an infrabass for the C4 system or a high output, alternative subwoofer for the F1222 or C7 systems. When used with a C4 system, d&b recommend a ratio of four C4-SUBs to one B2. The B2 cabinet is constructed from marine plywood, has an impact resistant paint finish and eight integral steel handles. The front of the subwoofer cabinet is fitted with catches at the sides for securing an optional transport lid, and mounted on the rear are four heavy duty wheels.

Amplifiers

The B2 is driven by d&bs D12 dual channel amplifier configured for the B2. More detailed information on specific loudspeaker setups with d&b amplifiers is available either in the relevant loudspeaker or amplifier manuals.

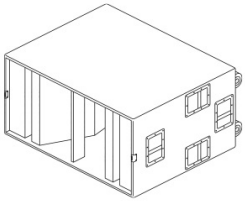

Fig. 1: B2-SUB

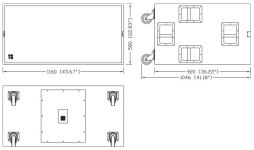

Fig. 7: B2-SUB cabinet dimensions in mm [inch]

Features:
• Max. sound pressure (1 m, free field) with D12
• 139 dB 2 x 18 inch driver
• Cabinets per channel D12
• 2
• Dimensions mm (h x w x d) 1160 x 580 x 920
• 102kg
• Power handling capacity (RMS / peak 10 ms) 600 / 2400 W

Applications:
• Theatre
• Rock n Roll
• Live Event
• Houses of Worship
