MIDI

MIDI SOLUTIONS R8 BOX

Event types are programmable and include: Note Control Change Program Change System Exclusive

The MIDI Solutions R8 8-output MIDI-controlled Relay Array contains eight relays which can be programmed to open or close in response to MIDI events. Fast reed relays are used for a response time of less than 2ms. Relay contacts are rated at 500mA. Contacts are made available via connections at the tip and sleeve of 1/4 inch mono phone jacks. When switching inductive loads be aware of precautions that must be taken to avoid back EMF problems. The R8 is programmed by sending it MIDI System Exclusive messages. This is easily done with the MIDI Solutions Programming Tools software. Once programmed, the R8s settings are retained even after power is removed. The R8 can be reprogrammed with new settings as often as needed. The R8 is MIDI-powered, and requires no batteries or power supply to operate with most MIDI products. A MIDI indicator LED lights up when the product is powered and flashes when MIDI data passes through it.
