COMPUTING - SWITCH OVER

NEMESIS AD16SW 16 CH. ADAT SWITCHOVER UNIT

Nemesis Audio AD16SW 16-Channel ADAT Switchover Unit with Word Clock Distribution

The Nemesis AD16SW is a 16 channel ADAT changeover unit, allowing switching between two ADAT compliant devices. The Nemesis AD16SW is perfectly suited to theatre or on-stage backing track playback systems where backup redundancy is important, allowing a seamless switchover if the main playback source was to fail. The large illuminated front panel buttons makes operation straightforward and includes built-in remote control switching for integration to external devices or direct connection to a master such as the Nemesis CCS-2 Control Switch. The AD16SW also includes a 2-channel word clock distribution amplifer.

Key Features: - Switch up to 16 Channels of Audio via dual 8-Channel ADAT paths (2 2-In/1-Out) - Industry standard TOSLINK optical connectors - In-Built Word Clock Distributor to provide digital clock signals for each source - Front Panel Word Clock Present and Frequency Indicators - Large illuminated front panel pushbutton switches facilitate easy source selection - Audio switching is performed on word clock edge to minimize digital spikes - 5-Pin XLR remote port for external control and remote source indication - 115V/230V Dual Mains Operation - Remote switching to allow sync with Nemesis CCS-2 Computer Control Switch - Remote switching via 3rd Party GPI connectors
