LOUDSPEAKERS

d&b audiotechnik C7 TOP SPEAKER

The C7-TOP is a 2-way horn loaded loudspeaker that exhibits true constant directivity above a frequency of 600 Hz, ensuring equal sound within the coverage area. The bass-reflex design of the low end allows the C7-TOP to be used without a subwoofer, and with its medium to high sound pressure levels and extended directivity it is ideal for balcony or stadium sound reinforcement, delay and background music playback. Where a more powerful PA system is required a C7-TOP can be stacked with two C7-SUBs. The C7-TOP cabinet is constructed from marine plywood, has an impact resistant paint finish, steel handles and MAN CF4 stud plate rigging points. The front of the loudspeaker cabinet is fitted with catches at the top and bottom for securing an optional wooden lid, and mounted on the rear panel are ratchet strap guide plates, two hinge plates and four heavy duty wheels.
