LOUDSPEAKERS - SUB BASS

d&b audiotechnik E12 SUB BASS LOUDSPEAKER

The small E12 subwoofer system with its special bass-reflex tunnel produces a tremendous SPL with minimal power compression and negligible port noise when used as a bass extension for the E0 and E3 systems. This extraordinary high output capability from such a small cabinet means it can be used with up to four E0 or two E3 loudspeakers, and is ideal for permanent or mobile use in small and medium sized venues, or where space is restricted. The E12-SUB cabinet is constructed from marine plywood with an impact resistant paint finish, a steel handle in one side and a M20 threaded flange on the top to accept a loudspeaker stand.
