

MICROPHONES

DPA 4088 DIRECTIONAL HEAD MIC PINK > 3 PIN LEMO

The classic d:fine 4088 Directional Headset Microphone is the industry standard in professional headset mics. It offers an open and natural sound making it ideal for both spoken word and vocal performance applications.

It also provides excellent off-axis rejection in high-SPL situations. The microphone efficiently suppresses distant sound sources making it perfect for demanding live performance environments where background noise and feedback are concerns.
